

Medical Career Pathways with Bendigo Health

Cardiology

Bendigo is fortunate to have 10 cardiologists and extensive interventional and non-invasive cardiology program with the facility for diagnosis and treatment of many different types of heart disease including, ischaemic heart disease, angina, heart attack, acute coronary syndromes, heart failure, electrical disorders of the heart, and valvular disorders of the heart.

The Cardiac Catheter Laboratory primarily provides diagnostic coronary angiograms; primary and elective PCI with intravascular ultrasound and FFR study capability; pacemaker, ICD, biventricular ICD/pacemaker insertions; electrophysiology and ablation procedures; pericardiocentesis; and intra-aortic balloon pump insertions.

The Diagnostic Cardiology provides transthoracic and transoesophageal echocardiograms; stress ECG and echo; pacemaker and ICD checks; ECG; Holter monitors; ambulatory blood pressure monitoring; and tilt table testing. The Department also has an extensive outpatient clinic and research program.
